"Because PulmoSal is pH balanced, I know my daughter is getting a non-acidic saline treatment."

PulmoSal 7%™ (pH+)™ is the only FDA Cleared sodium chloride inhalation solution formulation Bio-Balanced™ to match the natural homeostatic pH of Airway Surface Liquid (ASL) at 7.4 +/-

Today PharmaCaribe is a global leader in saline inhalation solutions with several products designed strictly to USP standards and a line of (pH+) Bio-Balanced™ formulations FDA cleared for commerce. Read more below.

HYPERTONIC SALINE SOLUTION INHIBITS SARS-COV-2 REPLICATION IN VITRO

A recent Brazilian study by Machado et.al presented data in a not yet peer certified reviewed preprint report that suggested **hypertonic saline solution (HS)** may have a possible role as a prophylactic and as *an alternative therapeutic option for COVID-19.*
