

Cosmo: AI Face & Body Editor is a comprehensive photo editing app that leverages advanced AI technology to provide users with a wide array of features to enhance their images. The app offers specialized filters and tools that allow users to experiment with different makeup styles, hair colors, and even reshape their body features for the desired look. Users can dive into an array of AI-generated avatars and art styles, including retro looks, cartoons, and anime filters. With the time machine effects, one can see their future self or alter their appearance to look like a baby or change their body shape.

For beauty enthusiasts, the app provides options to edit and apply virtual makeup such as lipstick, eyeliner, eye shadow, and foundation, as well as tools for skin smoothing and blemish removal. The AI hair filters offer a variety of styles, from beards to hairstyles, allowing users to find their perfect celebrity look-alike or try out a gender swap. Cosmo's retouching tools enable users to correct imperfections and enhance facial features, giving a professional finish to every selfie.

Moreover, the app includes an object removal feature and a photo background changer, enabling users to eliminate unwanted elements and swap backgrounds effortlessly. The app promises a user-friendly interface, making it accessible to both novices and experienced editors. Cosmo: AI Face & Body Editor serves as a personal digital makeup artist and stylist, providing a convenient and versatile solution for all photo editing needs.
