

EVA AI Chat & Clever Chatbot is an interactive storytelling app developed by Novi Limited, where users engage with a virtual chatbot in a variety of romantic narratives. Not a real person, the chatbot, named EVA AI, simulates conversation and responds uniquely depending on the user's choices, leading to different outcomes within the stories. The app offers a distinctive gaming experience, allowing players to personalize their in-game character by choosing a name and gender, making the virtual hero truly their own creation.

The app features both text and voice interaction, with the latter accessible via subscription, enhancing the storytelling with EVA AI's artificial voice and allowing players to add their own audio messages. Players can also send photos to influence the storyline, adding a personal touch to the gaming experience. The app promises privacy, a responsive chatbot available 24/7, and encourages user feedback, directing them to contact support@evaapp.ai for assistance or to discuss any issues.
