

FaceLike is an innovative AI-powered video face-changing app that offers users the ability to transform their appearance in videos with remarkable ease. Designed for iPad and available on the App Store, this app caters to users aged 12 and above, providing a range of fun face effects to explore.

At the heart of FaceLike's functionality is the Swap Cam feature, which enables users to achieve high-quality face changes instantly, adding an exciting twist to their video content. Additionally, the app includes a Cartoon Avatar option, allowing for the creation of personalized social cartoon avatars with just a single click. Another intriguing feature is the Time Machine, which uses photos to show users how they might look when they are younger or older.

FaceLike is a free app, but it also offers in-app purchases for those who wish to enhance their experience. The app's auto-renewal subscription system ensures uninterrupted service, with charges applied to the user's iTunes Account upon confirmation of purchase.
