

Krisp is a revolutionary noise cancelling app and AI meeting assistant designed to enhance online communication for individuals, teams, and enterprises. With its advanced AI algorithms, Krisp offers a suite of features that includes real-time noise cancellation, removing unwanted sounds, voices, and echoes from online meetings and customer calls. Additionally, Krisp provides meeting transcription services, automatically generating accurate, real-time transcripts for meetings and calls.

For those who need a concise record of their meetings, Krisp's AI Meeting Notes and Summary feature steps in to generate relevant notes, summaries, and action items, streamlining the follow-up process. This is complemented by an automatic meeting recording functionality that works across all communication apps.

Enterprises and call centers benefit from specialized features like AI Accent Localization, which adapts agents' accents to the customer's native accent in real-time, ensuring clearer communication. Secured on-device call transcription ensures confidentiality and efficiency during customer-agent interactions.

Krisp's flexibility is highlighted by its compatibility with any app, functioning as a smart layer between your device and any online communication platform, ensuring clear audio, and offering transcriptions and meeting notes. The seamless integration process involves simply selecting Krisp Microphone and Krisp Speaker in your app settings, enhancing productivity with unparalleled audio clarity.

Recognized by industry leaders and trusted by professionals worldwide, Krisp sets the standard for noise cancellation and AI-powered communication tools, making it an invaluable asset for anyone looking to optimize their online interactions.
