

Voi - AI Avatar Portrait Maker is an app designed by Codeway Dijital Hizmetler Anonim Sirketi. Voi allows users to create unique AI avatars from uploaded photographs. The app boasts the ability to turn users into various personas such as astronauts, fantasy characters, animated versions, or even an aged depiction of themselves.

Voi offers both a free version with ready-to-use personas and a premium subscription with unlimited creations for custom personas. Subscriptions can be weekly or yearly, with auto-renewal options that can be managed in the iTunes account settings. The app includes in-app purchases like Voi Pro subscriptions and credits for additional avatar creations. Users can share their AI-generated avatars on social media, use them as profile pictures, or even print them on canvas.
