

This online service offers fantastic works of art in custom frames, allowing artists and photographers to make a living from sales of their pictures. They keep costs low by utilizing print on demand. What is print on demand? It's a term that means only making a product and shipping it when an order is placed.

Pixels at a Glance

Pixels is a print-on-demand platform that enables creators, artists, and entrepreneurs to sell custom-designed products without managing inventory or handling fulfilment. The platform takes care of printing, packaging, and shipping, allowing sellers to focus on what they do best — creating designs that resonate with buyers.

Product Range and Capabilities

Pixels offers a diverse range of products that sellers can customise with their artwork or designs. From clothing staples like t-shirts and sweatshirts to lifestyle products such as mugs, notebooks, and wall art, the selection allows creators to build a comprehensive product line without any manufacturing expertise.

The Seller Experience

Selling on Pixels follows a simple process. You create and upload your artwork, determine which products will carry your designs, configure your pricing, and the listings go live. Most platforms provide design tools or templates to help ensure your artwork meets printing specifications.

Once an order is placed, the print-on-demand machinery takes over. Pixels prints your design on the product, ensures quality standards are met, and ships the finished item to the customer. You earn the difference between the retail price and the base production cost, with no need to invest in materials or equipment.

The print-on-demand market has experienced remarkable growth in recent years, driven by consumer demand for unique, personalised products and the increasing ease of starting an online business. Platforms like Pixels benefit from this trend by continuously expanding their product catalogues and improving print quality. For sellers, this means access to an ever-growing range of products and a steadily expanding customer base. Staying informed about industry trends, new product offerings, and shifts in consumer preferences helps you maintain a competitive edge in this evolving marketplace.

Maximising Your Sales on Pixels

- Experiment with different product types. A design that sells well on t-shirts might also perform on mugs, phone cases, or tote bags.
- Price your products competitively. Research what similar items sell for and find a balance between a healthy profit margin and attractive pricing for buyers.
- Keep uploading new designs consistently. Active shops with regularly updated

- catalogues tend to receive more visibility from the platform's algorithms.
- Research trending niches and design styles before creating your products. Understanding what buyers are looking for significantly improves your chances of making sales.
