

FreePik has changed substantially from the resource described in the original 2022 list; its current destination focuses on a former stock-design destination whose supplied URL now redirects to Magnific, an AI creative platform for image, video, audio, and 3D workflows. Review the current asset page and license before using any image commercially, because provider terms and individual-file restrictions can change.

Current status

FreePik has changed substantially from the resource described in the original 2022 list; its current destination focuses on a former stock-design destination whose supplied URL now redirects to Magnific, an AI creative platform for image, video, audio, and 3D workflows. The original list described it this way: “(\$14.99 mo) Not as main element. Attribution required.”

Best uses

FreePik is most relevant for AI-assisted creative production and editing rather than a direct replacement for the former free stock-photo listing. Search by the subject, orientation, visual style, and required output size rather than choosing an image only because it is free.

Licensing and commercial-use considerations

This is no longer the same destination described in the 2022 list. Generated content and any stock offering are governed by current Magnific account and plan terms; do not apply an old Freepik license assumption.

“Royalty-free” does not automatically mean no-cost, public domain, or unrestricted. Copyright permission also does not necessarily clear trademarks, artwork, private property, publicity rights, or a recognizable person’s likeness.

What to check before downloading

- Open the specific asset page and save its current license or receipt with your project records.
- Confirm whether attribution, modification, an extended license, or an account is required.
- Check restrictions on resale, print-on-demand products, templates, logos, redistribution, sensitive topics, and AI training.
- Verify model and property releases when identifiable people, interiors, artwork, or private locations appear.
- Make sure the resolution, crop, file format, and visual style fit the final placement.
