

Gratisography is an active resource focused on distinctive, whimsical photos and vectors that avoid conventional stock-photo styling. Review the current asset page and license before using any image commercially, because provider terms and individual-file restrictions can change.

What Gratisography offers

Gratisography is an active resource focused on distinctive, whimsical photos and vectors that avoid conventional stock-photo styling. The original list described it this way: “High-resolution and high-contrast photos, with new photos added weekly.”

Best uses

Gratisography is most relevant for playful campaigns, unusual blog illustrations, creative brands, and designs that need humor or visual surprise. Search by the subject, orientation, visual style, and required output size rather than choosing an image only because it is free.

Licensing and commercial-use considerations

Its current custom license permits personal and commercial projects and modification. It prohibits redistribution, claiming authorship, implied endorsement, prohibited subject uses, and merchandise where the picture itself is the product.

“Royalty-free” does not automatically mean no-cost, public domain, or unrestricted. Copyright permission also does not necessarily clear trademarks, artwork, private property, publicity rights, or a recognizable person’s likeness.

What to check before downloading

- Open the specific asset page and save its current license or receipt with your project records.
- Confirm whether attribution, modification, an extended license, or an account is required.
- Check restrictions on resale, print-on-demand products, templates, logos, redistribution, sensitive topics, and AI training.
- Verify model and property releases when identifiable people, interiors, artwork, or private locations appear.
- Make sure the resolution, crop, file format, and visual style fit the final placement.

Provider availability, pricing, and terms can change. This overview is a research starting point, not legal advice or a substitute for the provider’s current license.
