

Deploy a **custom-trained AI employee** that knows your business, answers questions, and automates workflows 24/7.

Starting at \$1,500 Typical Duration: 2 - 6 Weeks

Intelligence on Autopilot

Standard chatbots are frustrating. **Custom AI Agents** are intelligent. We build agents trained specifically on *your* data—your PDFs, your support docs, your inventory.

Whether you need a customer support rep that never sleeps, an internal research assistant, or a lead qualification bot, we engineer the prompts and knowledge retrieval systems (RAG) to make it accurate and safe.

AI Stack

RAG Knowledge

Retrieval-Augmented Generation allows the AI to reference your specific business documents for answers.

Prompt Engineering

Advanced system prompts to control tone, accuracy, and prevent the AI from "hallucinating" wrong answers.

Seamless UI

Beautiful chat interfaces embedded directly into your website or internal dashboard.
