

Build a **Minimum Viable Product (MVP)** to test your startup idea or internal business tool concept.

Starting at \$5,000 Typical Duration: 4 - 8 Weeks

From Idea to Reality

Don't spend a fortune building the wrong thing. We rapidly prototype functional web applications using standard technologies (PHP/MySQL or JS) to validate your core logic.

Includes user authentication, dashboard reporting, and CRUD (Create, Read, Update, Delete) operations for your specific data.

Core Functions

Auth & Security

Secure user registration, login, and profile management tied to role-based access.

Dashboards

Visual charts and data tables to track KPIs and user activity in real-time.

Scalable Code

Built on MVC frameworks that allow for future growth, not "no-code" locked-in platforms.
