

Moving your website to a new hosting provider or changing your domain name with **limited downtime**.

\$450 - \$900 Duration: 5 - 10 Hours

Stress-Free Moving Day

Moving a website involves more than just copying files. It involves DNS propagation, SSL handling, database serialization, and email account migration.

We manage the entire process, ensuring your site stays live during the transition and that your SEO rankings are preserved via proper 301 redirects if the domain is changing.

Migration Steps

Data Transfer

Secure rsync transfer of all files, databases, and media assets to the new host.

DNS Management

Updating nameservers and A-records with zero-downtime propagation strategies.

SSL Re-install

Ensuring the padlock icon remains green and valid on the new server immediately.
