

A comprehensive **one-time update sweep** for clients who don't want a monthly subscription. We bring everything up to date and check for immediate issues.

\$250 - \$450 Duration: 3 - 5 Hours

Safe & Secure Updates

Clicking "Update" can sometimes break your site. We take the anxiety out of maintenance by performing a full manual backup before applying any patches.

We update your CMS core (Joomla/WordPress), all plugins, and templates, then manually review the error logs and critical pages to ensure everything is still working perfectly.

Update Process

Full Backup

We take a complete snapshot of files and database before touching anything.

Error Log Review

Checking server logs for silent PHP warnings that might indicate future problems.

Security Audit

Quick scan for known vulnerabilities in your currently installed extensions.
