

Modernize your **large-scale corporate website** with a data-driven migration and design overhaul.

Starting at \$8,000 Typical Duration: 2 - 3 Months

Scale Without Breaking

For organizations with 1,000+ pages, multiple user roles, and complex workflows. We handle the heavy lifting of migrating legacy data to a fresh Joomla 5 or headless architecture.

Focus is on information architecture, accessibility compliance (WCAG 2.1), and editorial workflow optimization.

Enterprise Features

ACL & Workflows

Complex permission settings for different departments (HR, Marketing, IT) to manage their own content.

Data Migration

Safe transfer of thousands of articles, images, and user accounts from legacy systems.

Accessibility

WCAG 2.1 AA Compliance audits and implementation to mitigate legal risk.
