

Custom interactive tools — calculators, configurators, quizzes.

Starting at \$600 Typical Duration: 2 - 4 Weeks

Engage Visitors With Interactive Experiences

Static pages lose attention. Custom interactive tools — calculators, configurators, quizzes, assessments — keep visitors on your site longer, capture qualified leads, and demonstrate expertise before a prospect ever picks up the phone.

Every tool is built as a native CMS component using modern JavaScript with progressive enhancement, so it works on all devices and does not slow down the rest of your site.

What You Can Build

Calculators

ROI calculators, pricing estimators, savings projections — any number-driven tool that helps visitors understand value.

Configurators

Product builders, service selectors, or custom quote generators that guide visitors to the right solution.

Quizzes & Assessments

Interactive questionnaires that qualify leads, recommend products, or educate visitors while collecting contact information.
